Experience

JANUARY 2026 - Present

Eleveda Tech, Kathmandu - *Full Stack Developer*

- Built and integrated LMS APIs for a course enrollment system.
- Implemented mail services for system notifications and integrated payment APIs.
- Participated in deploying and hosting projects while testing and improving SEO and website performance.
- Worked on the admin dashboard of an e-commerce platform using Laravel Filament.
- Collaborated with international clients and gained experience understanding and implementing their requirements.
- Learned practical approaches to SEO and performance optimization for production websites.

DECEMBER 2024 - JULY 2025

Aventoz, Kathmandu - *Junior Backend Developer*

- Built and maintained voting registration and vote counting modules in Laravel, ensuring secure and accurate data processing.
- Developed and integrated REST APIs to enable smooth communication between backend services for an online learning platform.
- Improved backend performance and enhanced the reliability of data-handling workflows.

NOVEMBER 2023 - JANUARY 2024

Techore Solutions, Kathmandu - *Developer Intern*

- Assisted in frontend development using Next.js, focusing on responsive and user-friendly interfaces.
- Worked with REST APIs and data handling to connect frontend components with backend services built in Express.js.
- Gained hands-on experience with the software development lifecycle and collaborative development practices.

Education

2021 - 2026

Kathmandu University, Dhulikhel - *BSc. in Computer Science*

Projects

Pragyanam E-Learning Platform (2025) – Laravel, MySQL

Developed an e-learning platform that enables students and teachers to access educational content, manage courses, and authenticate users securely.

Aventoz Online Voting Platform (2025) – Laravel

Implemented voting registration and vote-counting features with secure data handling and role-based access control to ensure a reliable voting process.
