Experience

May 2026 - Present
Endeavor Nepal Pvt. Ltd., Kathmandu - *Software Developer*

- Developed a retirement records and pension calculation application for government teachers, including form workflows and role-based processing across multiple users.
- Integrated the application with the Personnel Information System (PIS) to retrieve teacher records and submit completed documents.
- Built a centralized Master NAS API to store and serve files from NAS infrastructure for multiple applications, using Laravel and polymorphic relationships.
- Maintained a multi-tenant legacy application comprising APIs, frontend interfaces, and a content management system (CMS), including bug fixes and enhancements.

JANUARY 2026 - May 2026
Elevexa Tech Pvt. Ltd., Kathmandu - *Full Stack Developer*

- Developed and integrated LMS APIs for a course enrollment system.
- Implemented email services for system notifications and integrated payment APIs.
- Contributed to an e-commerce administration dashboard using Laravel Filament.
- Assisted with project deployment, hosting, SEO improvements, and website performance optimization.
- Collaborated with international clients to understand requirements and implement application features.

OCTOBER 2024 - DECEMBER 2025
Aventoz Nepal Pvt. Ltd., Kathmandu - *Junior Backend Developer*

- Developed and maintained Laravel modules for online voting registration and vote counting, supporting secure and accurate data processing.
- Developed and integrated REST APIs for communication between backend services in an online learning platform.
- Improved backend workflows, data handling, and application reliability.

MARCH 2023 - SEPTEMBER 2024
Techore Solutions Pvt. Ltd., Kathmandu - *Junior Frontend Developer*

- Developed responsive frontend interfaces using Next.js.
- Integrated REST APIs and connected frontend components with backend services built using Express.js.
- Collaborated on application development and gained experience with software development lifecycle practices.

Education

2021 - 2026
Kathmandu University, Dhulikhel - *BSc. in Computer Science*

Projects

Master NAS API - Laravel, Filament

Developed a centralized file-storage API integrated with NAS infrastructure to provide shared file storage for multiple applications.

NARC website - laravel

Supported a multi-tenant website, API, frontend, and CMS through maintenance, troubleshooting, and bug fixes.

E-pension STRO (National Teacher Record Office) - Laravel

Developed a government teacher retirement and pension workflow application integrated with the Personnel Information System (PIS).

Achievers College (Australia) (2026) – Laravel, NuxtJS

Built a student enrollment and portfolio platform integrating aXcelerate services, later migrated to RTO Pilot.

Mcquel Health Care website – Laravel, NuxtJS

Contributed to an e-commerce website supporting product listings, ordering, payments, customer dashboards, and product and order administration.

Elevexatech website (2025) – Laravel, NextJS

Developed a company website with an interactive Next.js frontend.

Pragyanam E-Learning Platform (2025) – ReactJS, Laravel

Developed an e-learning platform for students and teachers to access educational content and manage course modules.

Aventoz Online Voting Platform (2025) – Laravel

Implemented user registration, secure online voting, automated vote counting, and role-based access control.

CCRC Entrance Result (2025) – Laravel

Developed an entrance result management system for processing and publishing academic entrance results.
